# YOUR PATH TO A CAREER IN GAMES AND INTERACTIVE DESIGN

COURSE CODE: 307JA.1

CRICOS CODE: 03037G

## BACHELOR OF GAMES AND INTERACTIVE DESIGN

In this degree students will gain experience in the design and creation of games and interactive digital media. This will include the theoretical and practical skills and knowledge required to work in either a technical or creative role. Students will develop an understanding of the game design and production process from concept development and idea generation through to the production methodologies. Students will be at the fore front of developing Virtual Reality environments as the VR technologies keep emerging and improving.

The games and interactive design industry is growing rapidly in both local and international markets with revenue in the billions. Virtual Reality is tipped as the next biggest technology application / revenue since the introduction of the mobile / smart phone. Some of the biggest companies in the world including Google, Microsoft and Samsung are leading the way. The industries most suited for this degree include game development, interactive media, screen visual effects and virtual production.
