Learn all about AutoCAD!

This course assumes the student does not know AutoCAD, and so the course begins with the basics. Students are then introduced to the drafting capabilities of the program, followed by the modifying/editing functions. Various exercises and two mechanical drawings are offered.

The functions covered include drawing, modifying, layering, linetypes, lineweights, colours, blocks, attributes, hatching, text, dimensioning, title blocks, layouts, scaling and printing/plotting using AutoCAD 2013 software.

This short course is non-accredited therefore is not registered ...

Outcome
On completion the student will have the ability to use AutoCAD for simple tasks working in a design or drafting office. It also offers the opportunity for a student to continue to further levels of AutoCAD, or to be trained in a specific discipline… engineering, architecture, steel fabrication… to mention a few.
